Petition to Get Veggie Dogs in Our School!

Pigs raised on factory farms live in horrible conditions. The mother pigs live 4–5 years in a crate where they cannot walk or even turn around. Their babies are then raised for 6 months in filthy farms where many of them suffer from diseases. The pigs are then slaughtered; some are still conscious as it happens.

As students with a conscience, we ask to have a viable alternative to animal products in our school.

We the undersigned students, request the cafeteria of

_____
NAME OF SCHOOL

to put veggie dogs (with no animal products) and other animal-free meat substitutes on the menu.

We will purchase these foods!
